

# QME SPOTLIGHT ECOSYSTEM OFFERINGS

## Digital Community Portals

### Does your community need more economic development?

We have developed a digital product designed to support small business growth / development and accelerate economic development within communities. It is called Qmelocal.com. This solution helps develop sustainable and long term solutions and includes an ESG impact. Think of this as a "**Digital Infrastructure Delivery System**" which could also help to solve environmental challenges. In short, within 6-8 weeks we can customize a "Digital Community Portal" for any borough, county, city, state and or country which will help "**Empower Change in that Community**" as it begins to solve its own problems by connecting and galvanizing all of the stakeholders, including the residents and small business owners.

Seven benefits to the communities are:

- Gives greater access to expert facilitators, tools and resources
- Provides technical assistance & readiness support from all local community providers
- Builds critical capacity
- Fosters greater collaborations
- Accelerates knowledge-sharing and learning (smarter communities)
- Enhances ESG
- Becomes the Digital Infrastructure to enhance community "self" problem solving

**HOW OUR TECHNOLOGY IS BEING DEPLOYED IN THE US TODAY:** Here are some of the support links to digital assets we have developed for different communities to help accelerate economic development.

- Qme has launched two "Digital Communities" and have a few more being launched in next 90 days.
  - <https://daytonbusinesscenter.com/home> (To help Dayton, Ohio)
  - <https://steeltonspotlight.com/home> (To help Steelton, PA)
- Qme has harnessed our "Digital Community Portal" product to help galvanize minority business news reporting in America.
